

## **JOHN H. PREY – BIO SKETCH**

**I have over 40 years of experience of working in major manufacturing associated with the auto industry and farming/industrial equipment. The majority of experience has been in plants working in senior management in Production, Quality, Personnel, Maintenance, Industrial Engineering and Accounting. I was also involved at Corporate when I worked on improvement projects in major manufacturing plants worldwide.**

**During the time I was associated with the American Foundrymen's Society, I worked with committees that developed a process for sand reclamation and tools and testing procedures to reduce employee exposure to vibration from air tools.**

**After retirement from the auto industry, I worked with a major automotive parts supplier to improve a hybrid engine for use in commercial vehicles.**

**Presently, I am part of the Purdue University program to provide training for small businesses in lean manufacturing. We travel the entire state of Indiana and, at times, assist neighboring states to improve their operations and remain competitive in the area of world manufacturing.**
