

## **M. A. "Woody" Robinson – Bio Sketch**

I was a Manufacturing and Plant Operations professional with over 36 years experience in the Metalworking Industry. I've held Senior Management positions in International companies, including responsibilities for multi-plant assignments – as Plant, Operations, and Manufacturing Manager. I'm experienced in precision machining and grinding, welding and fabrication, as well as assembly of various complex end products. I've worked with, and have experience in, both union and non-union environments.

I'm now in a second career as an Executive Recruiter with our company – The Robinson Group, LLC – in downtown Greenwood, IN. As a logical match with my experience, The Robinson Group specializes in recruiting for Manufacturing firms throughout the USA – for professional candidates – such as: Engineers, Plant & Operations Managers, Human Resource Managers, Quality Managers and Accounting Professionals. The normal Client companies we serve are in Metalworking Manufacturing Industries and Chemical Manufacturing Industries.
